

La St John's Hwy Concern

NOV 150

I have written the Prime Minister, Mrs Irwin, Mrs Denton, Mrs O'Brien, & ~~Mrs~~ Sue Borass. Hoping these letters would help settle the unrest at the community of Tappanwash.

The cause of our problem is the Federal Government dragging the settlement of the military base and the lack of protection for the people like us who live close to their property. This also caused the take over of the Provincial Park, which has turned into a nightmare for everyone.

There has been noise night & day with cars using the old road on the base racing up & down to the Provincial Park. They don't leave our property to long at one time together, we have to take care of what we have left. Our property value has dropped 50% or over. This is what we are told, but real estate will not even list our properties because they can't sell no one is interested in this area. The new value is to the tune of \$50,000.00 when we retired to live here 3 yrs ago. Now they say our property is worthless. I would almost call this abuse for every human being in this area.

Children do not play outside because their parents worry. Kids are fat & fat between because of softy. While the cover is on the ground the air is cleaner, they are not looking forward to spring because we cannot

in our doors & windows, there is so much
dust from cars at the base going past our
house to the Provincial Park

There have been five deaths since
the Military left the base ~~in~~
~~the~~.

This situation at Tupperware should be
top priority in parliament to be settled
before there ~~is~~ is any more tragedy.

People are wearing down, there is
a lot of depression. There are the
forgotten taxpayers, veterans, & some
huddling citizens (Canadian & other). I hope
whoever reads this letter will please
help us with the government problems
which has become our problem, it is
a ~~big~~ big one.

Sincerely
